Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

1. The amendment filed on 19 June 2003, canceling all claims drawn to the elected invention and presenting only claims drawn to a non-elected invention, is non-responsive (MPEP § 821.03). The remaining claims are not readable on the elected invention as set forth in paragraphs 2 et seq. The question of being non-responsive extends beyond the species matter, including other matters as set forth below.

Since the above-mentioned amendment appears to be a *bona fide* attempt to reply, applicant is given a TIME PERIOD OF ONE (1) MONTH or THIRTY (30) DAYS, whichever is longer, from the mailing date of this notice within which to supply the omission or correction in order to avoid abandonment. EXTENSIONS OF THIS TIME PERIOD UNDER 37 CFR 1.136(a) ARE AVAILABLE.

2. Newly submitted claims 1 and 4-18 as amended are directed to an invention that is independent or distinct from the invention originally claimed for the following reasons:

- Species A, nitrous oxide, nitrogen monoxide or laughing gas, all identical, and
- Species B, mixed nitrogen oxides including nitric oxide.

Applicant is required under 35 U.S.C. 121 to restrict the claims to Species A, the originally claimed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim is generic.

Upon the allowance of a generic claim, applicants will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicants must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicants traverse on the ground that the species are not patentably distinct, applicants should submit evidence or identify such evidence now of record showing the species to

be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

3. Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, amended claims 1 and 4-18 are withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

4. Applicants' response/arguments are not understood. There is no basis for a composition as originally claimed, by formula, of "NO", that is nitric oxide. Nitrous oxide is not generic to nitric oxide. See Hawley, page 612 newly cited and pages 501, 616, and 620 as cited in Paper No. 7. In PCT terminology as to the species, there is no "special technical feature" in common, that which forms an improvement over the prior art, under PCT Rule 13.2. Applicants have failed to make any arguments in response to the rejection of paragraphs 2 and 4 of Paper No. 7 regarding nitrogen monoxide, laughing gas and nitrous oxide being the same thing by a different name. Further, applicants have submitted no copy of a form 1449. However, a translation of the IPER, PCT Form 409, and the search report, have been located in the file. A complete, proper response to the prior action is required, see 37 CFR 1.111 and 1.135(b).

5. Any inquiry concerning either this or an earlier communication from the Examiner should be directed to Examiner Edward A. Miller at (703) 306-4163. Examiner Miller may normally be reached Monday-Thursday, from 10 AM to 7 PM.

If attempts to reach Examiner Miller by telephone are unsuccessful, his supervisor Mr. Carone can be reached at (703) 306-4198.

If there is no answer, or for any inquiry of a general nature or relating to the application status, please call the Group receptionist at (703) 308-1113.
